## Official opening of the YES Incubator and promotion of the tenants!

Dear readers,

We are proudly announcing that the official opening of the YES Incubator happened on the 27th of September in the premises of the YES Foundation. Around 80 guests were present at this event including representatives from donor bodies, SINTEF and SOROS, Norwegian Ministry of Foreign Affairs, the business community, universities, international organizations, partners as well partners of the tenant companies. We have presented our main

activities and services as well as the first tenant companies.

Additionally, the activities and tenants of the Incubator were promoted and presented at the SEEITA Conference and MASIT Open Days on the 27th and 28th of September as well as on Microsoft Vizija held on the 9th and 10th of October. The management of the Incubator managed to enable participation of all tenant companies at both events which was an excellent opportunity for promoting these

new coming companies on these international events and among the local and regional business community participants.

Lastly, but not the least we are informing that we are still open for new potential tenants that have entrepreneurial ideas and would like to launch their own ventures!

*Sincerely,*

*YES Foundation team*

### SEEITA Conference and MASIT Open Days

On the 27th and 28th of September the 5th SEEITA Conference and the 4th MASIT Open Days events were held in Skopje. The purpose of these events were: regional cooperation in the area of ICT, identifying growth markets in Southeast Europe and initiating new collaborative ICT projects.

The YES Incubator enabled participation for all the tenant companies at these events as well as promotion of the activities and the tenants on the Round table that was held as part of the Conference with a topic on Incubation process and Incubators in the region. This was a good opportunity for the tenants to mingle, discuss and learn from the well known companies and excellent opportunity for possible cooperation and matchmaking. Also, this was an opportunity to learn more about the local and the regional ICT business community.

Additionally there has been short presentation at the MASIT Open Days concerning the YES Incubator, the services that is offering and the first tenants.

### Microsoft Vizija

The 5th Microsoft Conference that is holding traditionally in Skopje is aimed at gathering the ICT community from Macedonian and the Southeast region and presenting the Microsoft technologies and products.

This year with a great thankfulness to the CEO of Microsoft Macedonia, Mr Gagovski, the tenants of the YES Incubator got free tickets for participating at these two days event. This was another good opportunity for the tenants and the management of the Incubator to be updated with the new technologies, services and products as well as to mingle with important representatives from the Microsoft business community worldwide.

### YES Computer Lab

At the end of September, Computer Lab was established and opened in the YES Foundation premises. The lab is equipped with up-to-date equipment for organizing mainly ICT trainings such as: Microsoft, CISCO, Office, Open Source as well as tailor-made trainings for specific programming languages and technologies. At the moment two of the tenant companies, Innovation and Malina Net, has started operating with trainings in CISCO, Microsoft and Open Source.
